Fun Day
for
Rhinos

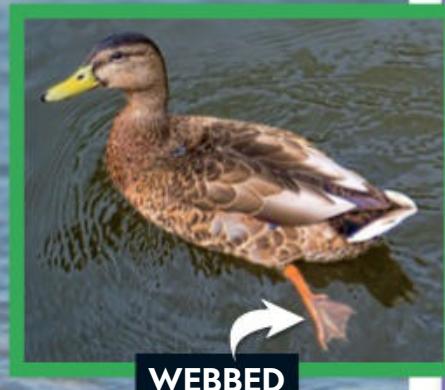

Why?

Why do you think ducks have funny feet?

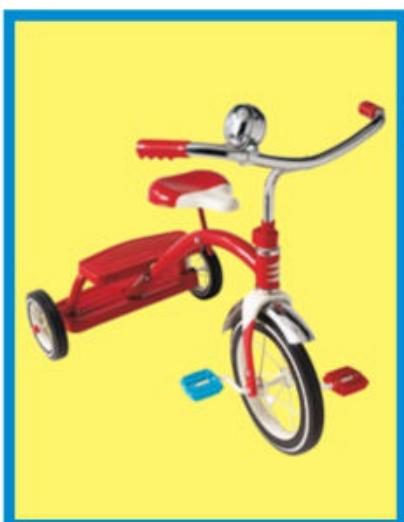

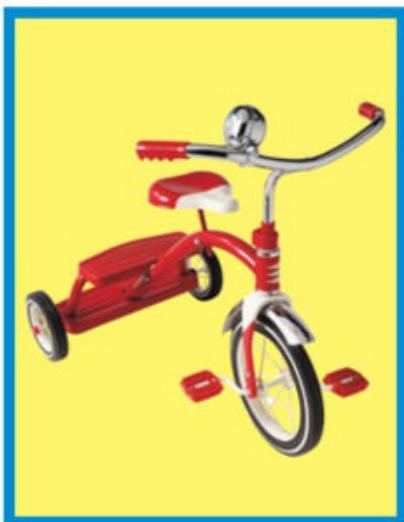

Ducks have extra skin between their toes. This is called webbing. They use their webbed feet like paddles.

WEBBED
FOOT

What Is Different?

Look at each picture in the top row.
Find the differences between it and the one below.

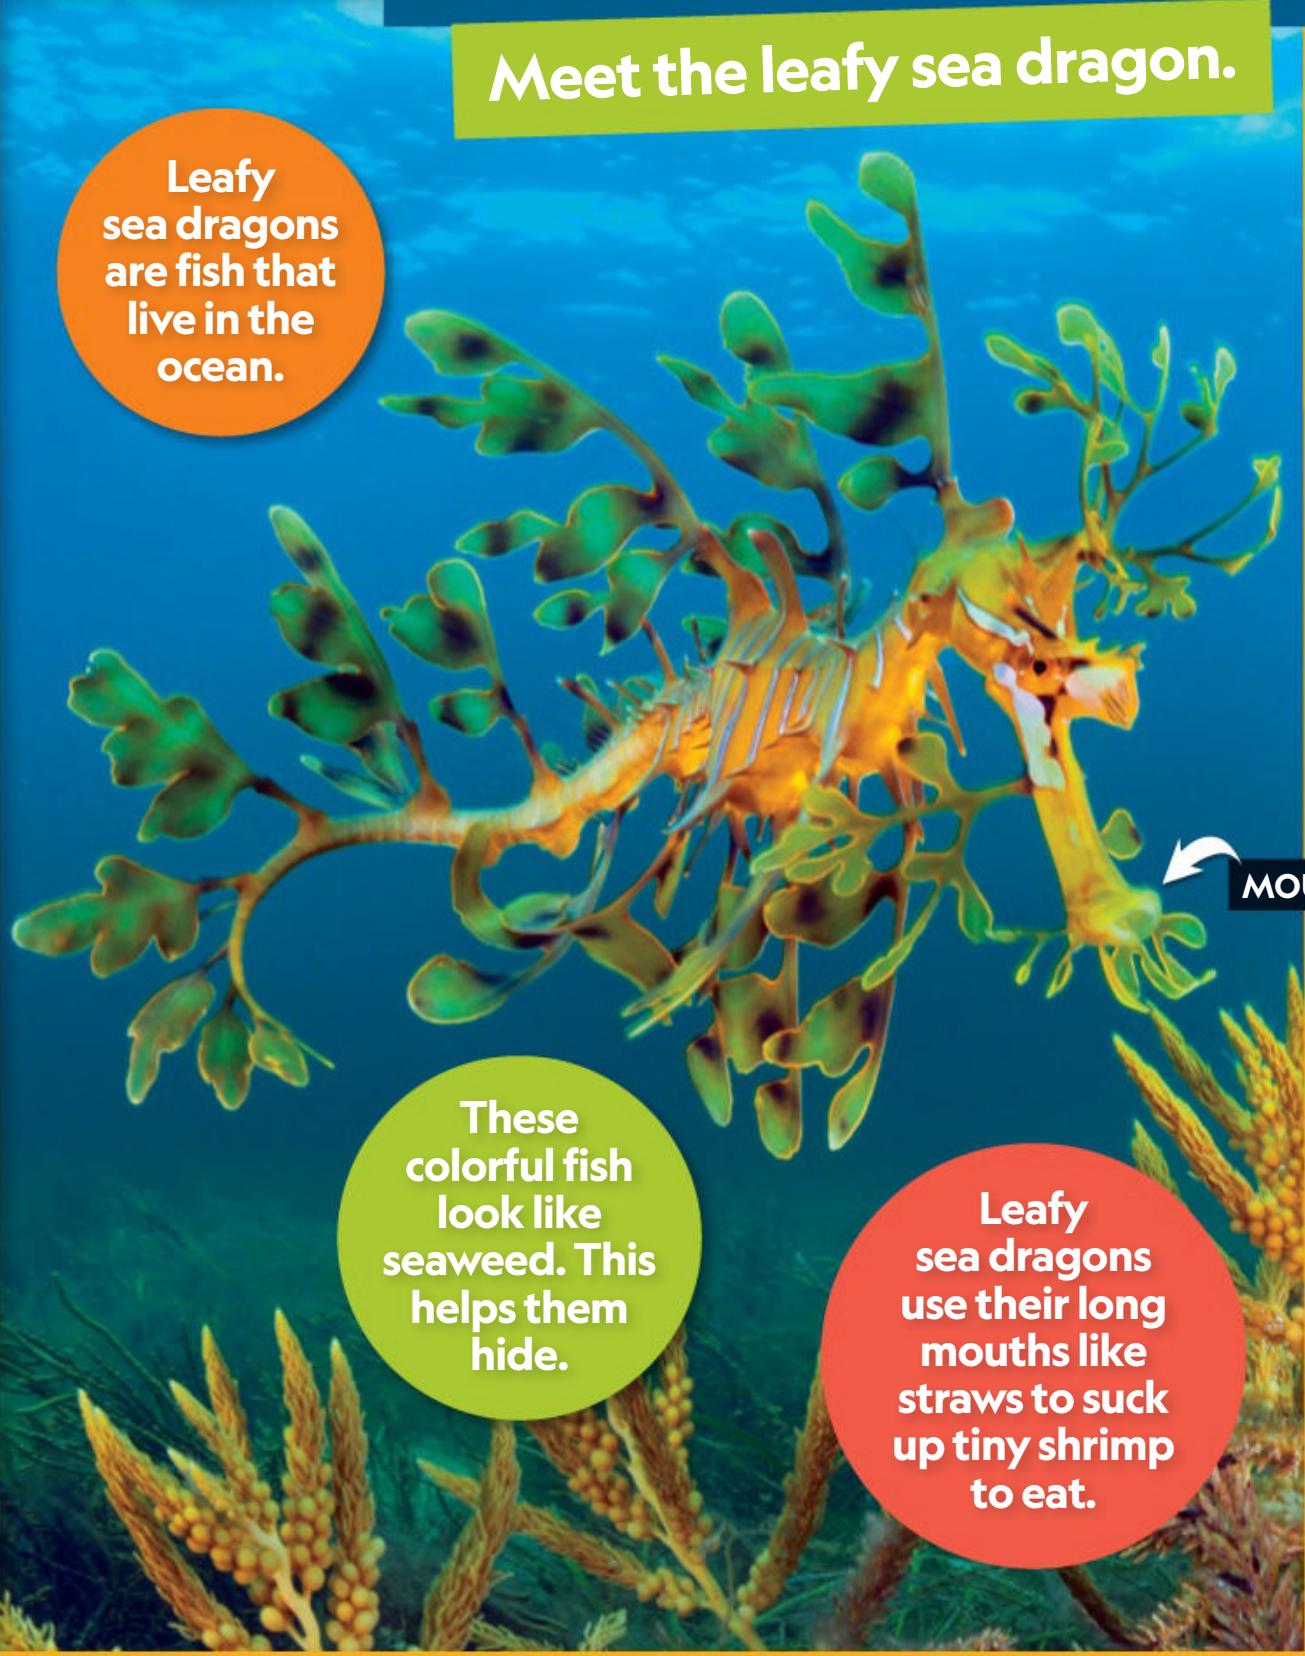

**Find one
difference.**

**Find two
differences.**

**Find three
differences.**

That's Cool!

Meet the leafy sea dragon.

Leafy sea dragons are fish that live in the ocean.

These colorful fish look like seaweed. This helps them hide.

Leafy sea dragons use their long mouths like straws to suck up tiny shrimp to eat.

MOUTH

What in the World Are These?

ANIMALS

MOTHER

BABY RHINO'S VERY GOOD DAY

CALF

A baby rhino spends
every day with its mom.
She helps the calf grow strong.

A baby
rhino is
called a
calf.

In the morning, Mom and baby eat grass. The mother watches out for hungry lions.

Mom
uses her horn
to protect her
baby from
lions.

A baby
rhino's horn
starts to grow
soon after it
is born.

The afternoon is hot. The rhinos cool off in water. They might even take a mud bath!

Now it is time to play. The rhino calf runs and rolls.

LEFT, MIDDLE, RIGHT

Each picture has three animals. One animal is on the **left** side. One is in the **middle**. One is on the **right** side.

Follow the clues to find the animals on the **left**, in the **middle**, and on the **right**.

ORANGUTANS

Tap the beak of the owl on the **left** side of the group.

Scratch the heads of all the animals in the **middle**.

Roar at the cheetah cub on the **right** side.

Circle the meerkat on the **left**.

Wiggle your nose at the raccoon in the **middle**.

Pet the neck of the giraffe on the **right** side.
Then pet the giraffe in the **middle**.

Draw the letter *L* through all the animals on the **left**.

E, RIGHT

RACCOONS

GIRAFFES

MEERKATS

CHEETAHS

OWLS

Do you color with
your right or left hand?

FURRY FLIERS

Flying squirrels live in trees. They glide from branch to branch to find food.

Gliding helps these squirrels get away from animals that want to eat them.

**Big eyes
help a flying
squirrel see
in the dark.**

WHAT IS AVAXHOME?

AVAXHOME -

the biggest Internet portal,
providing you various content:
brand new books, trending movies,
fresh magazines, hot games,
recent software, latest music releases.

Unlimited satisfaction one low price

Cheap constant access to piping hot media

Protect your downloadings from Big brother

Safer, than torrent-trackers

The squirrel spreads out its arms and legs. Flaps of skin catch the air like a parachute.

Say PEAR-uh-shoot.

SKIN FLAP

FIR TREE
NEEDLES

The squirrel lands on a branch. Now it has lots of food to eat.

Flying squirrels eat fruit, leaves, and fir tree needles.

OTHER SQUIRRELS

There are more than 200 kinds of squirrels. Here are a few.

RED SQUIRREL

INDIAN GIANT SQUIRREL

RICHARDSON'S GROUND SQUIRREL

TASSEL-EARED ALBERT'S SQUIRREL

CAN YOU HEAR ME?

Some animals have **big** ears.
Others have **small** ones.

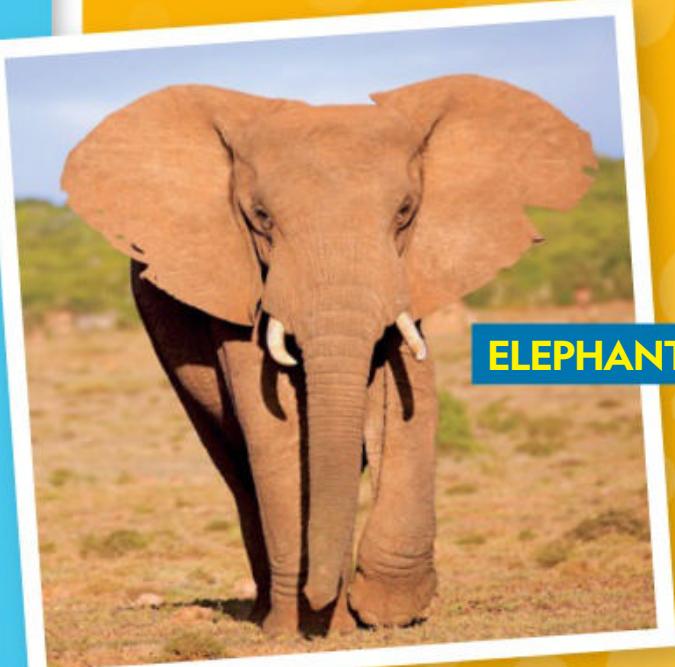

Look at these pictures. Tap all the animals with **big** ears.
Pet all the animals with **small** ones.

JACKRABBIT

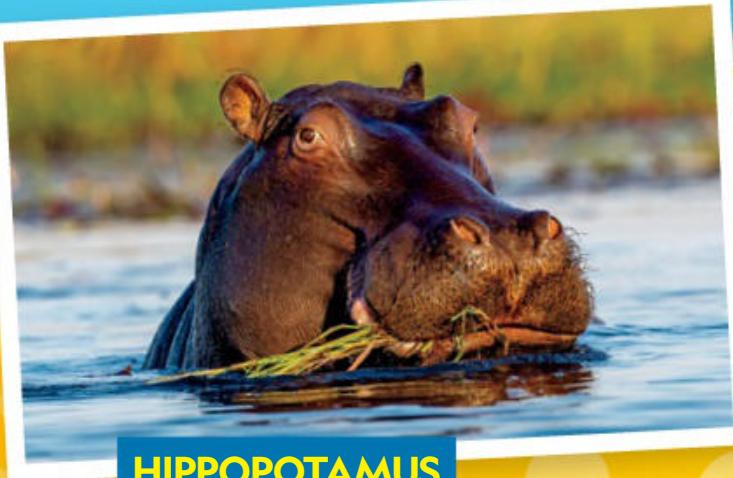

RIVER OTTERS

ELEPHANT

What kind of animal ears would you like to have?

HIPPOPOTAMUS

PIKA

FENNEC FOX

SEA LION

BAT

How many ears can
you count on this page?

JERBOA

AN ANT CUTS

1

2

A leaf-cutter ant has big, sharp jaws on its head. The jaws will cut a leaf into pieces.

The ant stabs its jaws into a leaf. The jaws cut the leaf like you would cut paper with scissors.

A LEAF

3

4

The leaf is big and heavy. But the ant is very strong. It carries the leaf to its nest.

Back at the nest, a food called fungus grows on the leaves. The ant eats the fungus.

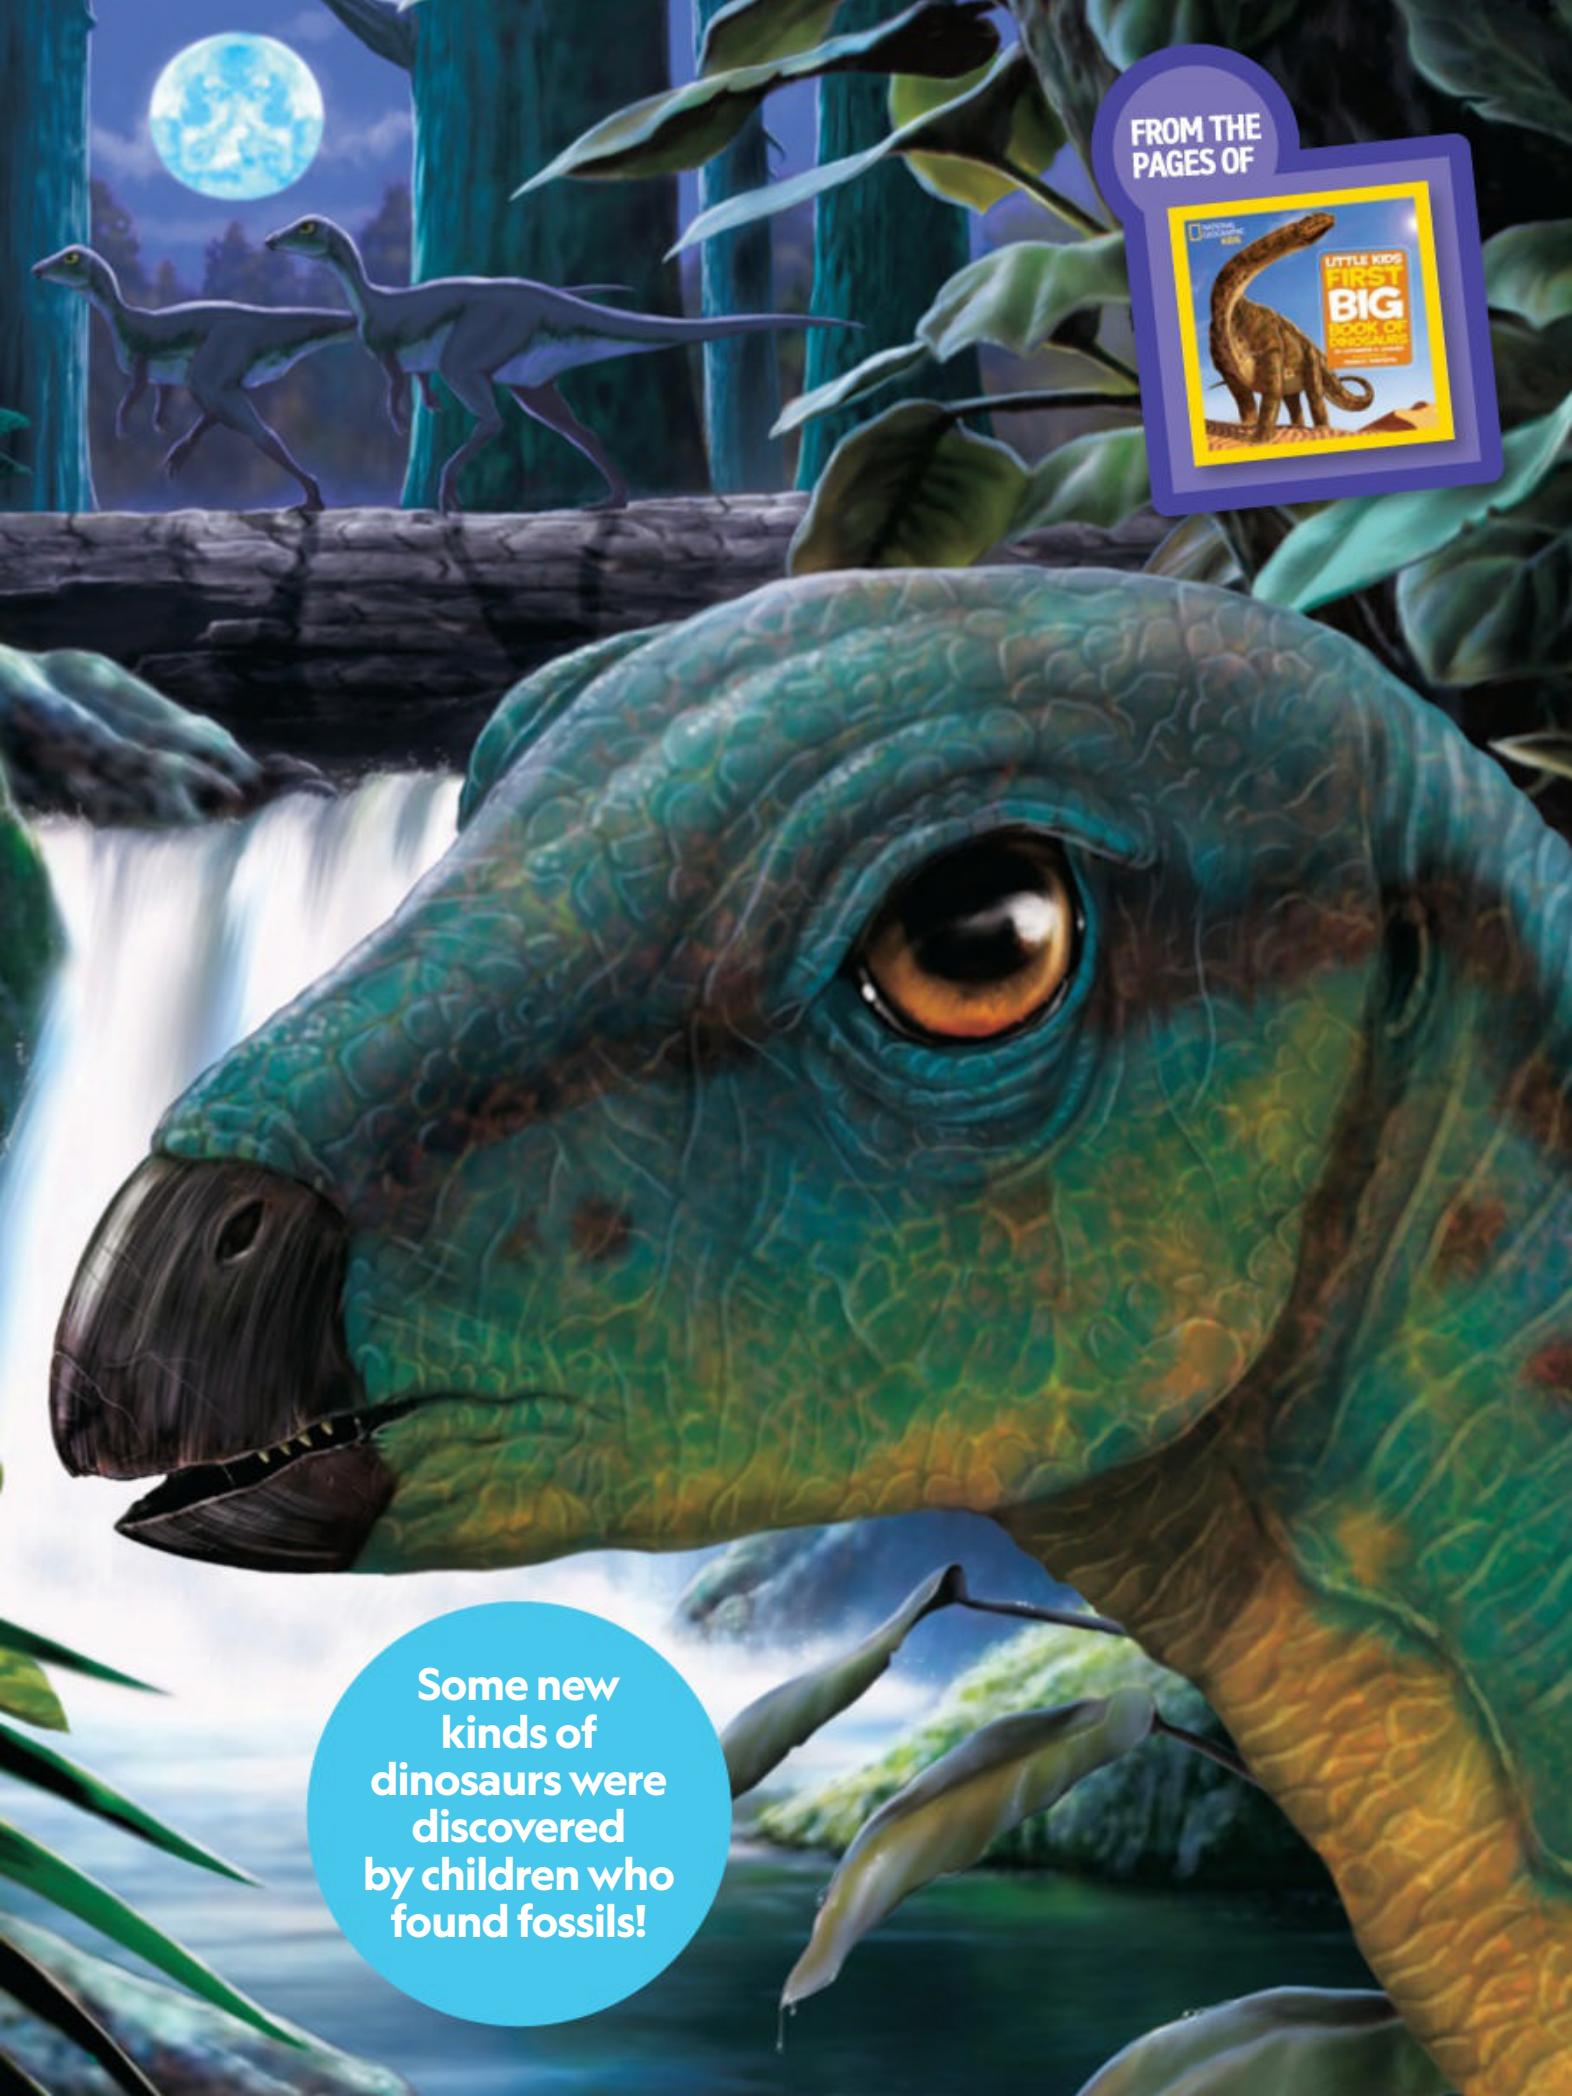

BIG-EYED DINOSAUR

FACTS**FOOD**
plants**SIZE****FIVE-YEAR-OLD**

This small plant-eater lived near the South Pole, where it was dark and cold part of the year. *Leaellynasaura* might have dug burrows to curl up in so it could stay warm.

SAY MY NAME: lee-EL-in-a-sore-a
